# AI Weight Scale

The disruptive precision AI Weight Scale utilizes AI edge computing technology to calculate weight of chickens in an intuitive way, where total weight divide by the number of chickens recognized by the AI scale auto calculate the average weight of each chicken. The data is then uploaded to the cloud, allowing farmers easily access.

Weight(g)

20 days
899 g

Standard Weight ●    Average Weight ●

**AI Camera**

**Weighing platform**

| Item | Sepcification |
|------|---------------|
| Product name | AI weight scale |
| Model name | W206-30A |
| Measuring range | 0-20 Kg |
| Precision | 10 g |
| Working temp. | 0～50 °C |
| Power | AC 100V-240V, Max 20W |
| Camera resolution | 2M pixels |
| Camera FOV | 120 °C |
| Storage | 16 GB or 128 GB |
| Product weight | 10 Kg |
| Product size | Diameter 60cm / Height 110-140cm |
| Wireless | Wi-Fi IEEE 802.11a/b/g/n/ac 2.4GHz 5GHz |

## Key Features

* Ultra high accuracy 98.7%
* Real-time health monitoring
* Available for all varieties
* Improved revenue

* Lower feed/labor cost
* Precision farming
* Accurate and reliable  (25g Average error)
