

AI Bird Repeller

State-Of-The-Art AI Bird Repeller captures images using camera, AI calculations are performed to activate the laser and repel the largest group of wild birds. Since wild birds are easily startled creatures, when one flies away, the entire group flies away, achieving the desired bird repellent effect. The base rotates 360 degrees, providing full protection for the safety of the poultry house.

Item	Specification
Product name	AI Bird Repeller
Model name	L106
Scanning angle	0° ~ 360° horizontal -85° ~ 20° vertical
Laser	520nm, 500mW
Working temp.	0 ~ 50°C
Power	AC 100V-240V, Max 100W
Camera resolution	4K
Camera FOV	70°
Storage	1 GB or 128GB
Product weight	7 Kg
Product size	14 cm x 20 cm x 30 cm

Key Features

- * Increase biosecurity
- * Lower risk of bird flu
- * Auto bird deterrence
- * Long-term effectiveness
- * Avoid disease loss
- * 360 degree guarding
