

Smart Semen Analyzer

iSperm is the first mini/mobile computer-assisted sperm analyzer (mCASA). It offers readings, videos, and semen extending calculations and saves these analytics that makes real sense for veterinarians and breeders need in daily practice. Capable of analyzing semen qualities for various species, iSperm provides the flexibility to be adapted to economic, companion, and endangered animals.

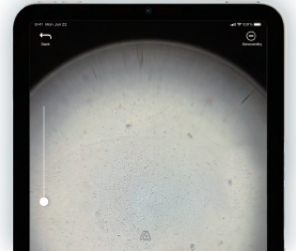

A Portable Computer for Semen Analysis

- ✓ Accurate
- ✓ Affordable
- ✓ Anytime, Anywhere for Anyone

Analytics with A Few Taps

- ✓ Progressive Motility and Tracks
- ✓ Digital Data & Video Records

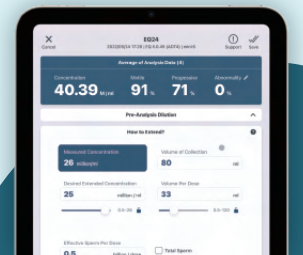

Your Data is Always within You Reach

History data can be saved both in Dta Center on the app and in your iPerm Cloud account.

Semen Packaging: iSperm Does the Math for You

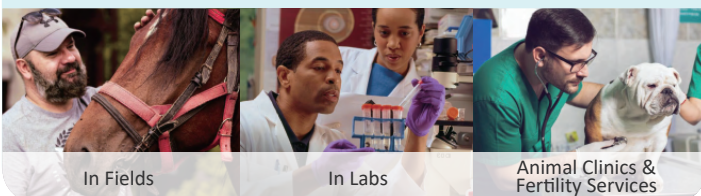

Get to know the exact volume of extender used and doses/straws of commercial semen to be dispensed right away

Multi-Species in One

The Flexibility of iSperm

The Value of Visualizing Tracks

- 1 Set up a common standard in a workplace to facilitate communications.
- 2 Identify problematic semen as early as possible.
