

Feed measurement sensor

Revolutionary patented sensor technology and predictive software provides real-time data on feed flow in barns for the livestock industry. Which can lower feed expenses, boost operational efficiency, and enhance animal health.

Product Features

- * Instantly monitor and predict feed line and barrel weight
- * Takes over 40 readings every second to ensure data accuracy
- * Designed to fit standard 3" (75mm) feed lines
- * IP66 dustproof and waterproof rating
- * Feed line delivery accuracy up to 95%
- * See summaries of each site and feed line
- * Receive real-time mobile notifications when issues occur
- * Spec : Input power 2W \ Input type RJ45 POE \ Data usage 500MB/Month
